The office

In the elegant setting of Via Guattani closed to Villa Torlonia, very close to the center of Rome and well connected (Termini train station and Porta Pia lines 36 - 60 - 90 Metro line A-B) our study is devoted to modern dentistry.

The working philosophy adopted, search the application of therapies and the use of latest generation techniques and proven clinical efficacy and, when necessary, the cooperation with highly qualified professionals in different branches, offers the opportunity to receive services in the same structure, specialized and excellent operational techniques.

Our mission is to offer the highest level of clinical efficacy, taking care of the welfare of the person in an organizational and operational environment of maximum comfort and a very affordable cost.

The continuous growth and the feedback received over the years lead us to constantly improve and pursue the goal.

More information you can find at www.studiodontoiatricobellucci.it

It is our hope that this medium can provide information and details to help you familiarize yourself with our structure, you can also find tips and answers to questions more frequent.

We accept payments via web and all major credit cards.

All patients can choose Custom Payment mode and gain access to forms of consumer credit, which are dispensed by Compass, up to 60 months interest-free.

Our partnership with Compass has more than ten years, we were one of the first studies in Rome to offer consumer credit lines, the practice is filled directly on line in the office, the response times are very short.

**The study is in accordance with all applicable laws.
It is equipped with professional equipment for cardio pulmonary resuscitation and semi-automatic defibrillator
Sterility protocols ISO 9001**

Treatment and care services

The office delivers therapies that cover **all branches of Dentistry**:

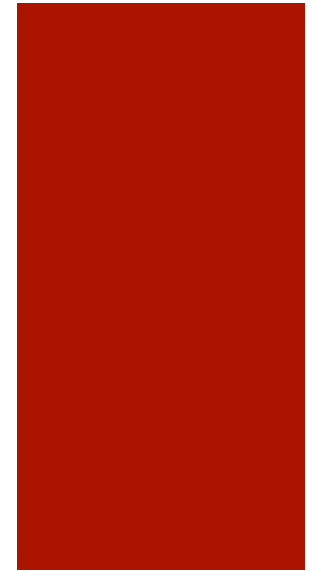

Operative Dentistry, Endodontics, Periodontology, Prosthetics, Orthodontics, Implantology, Paedodontics, Prevention and Igiene Maintenance.

The **Periodontics and Prosthetics** are the most outstanding disciplines constituting the operating range of D. Bellucci. The scientific awards, the teaching position at the Master of Periodontology Chair of the University of Rome and the admission as Active Member in the prestigious Italian Academy of Prosthetic (AIOP), are in fact the result of a career of thirty

years devoted to the pursuit of excellence in this field.

All other employees of the office are professionals of high technical and scientific profile, they also have received important awards and published original works of Italian and foreign scientific journals, they are part of our team for many years. A Maxillary and Implant Surgeon, two Orthodontist, two Paediatric dentist, an Endodontist and two Hygienists graduates.

At least but not last, the office offers also an **Aesthetic Medicine** service carried out by a Surgeon Specialist in Aesthetic Medicine.

The dentist of children

The first visit of Child

To cure the mouths of our children early, introduce them in a "soft" in the dentist's office, implement a correct and precise prevention program, it means giving them the health of the mouth and teeth for a lifetime.

It is necessary to refer young patients to a dentist very early. Ours is one of the few dental office offering a specialized service of dentists for children in Rome.

Knowledge and specific therapies. Our task is not only to solve the oral diseases of children, but also to shape people who do not have and will never have fear of the dentist.

It is very important to prepare our children to the first visit in the best way, to prove positive and calm, not uttering words that can strike fear, to behave calmly.

Our office belongs of the network of specialized studies in Child Dentists:

on our website: www.studiodontioiatricobellucci.it

or on that of the "children's dentist"

www.ildentistadeibambini.it you can find a lot of information and answers to the health and care of your children.

All therapies for children are entrusted to **specialized dentists Doctors in Paediatric Dentistry** and Orthodontics.

The psychological approach to the little patient and nursing mode follow the guidelines of the American Society of Paediatric Dentistry.

We apply, if necessary, **conscious sedation with nitrous oxide** and, if necessary, it is available in the office a Doctor Surgeon Anesthetist.

Our mascot **Luigino** accompanies The kids all the time ...
